

I have recently tuned to XM Instant Traffic & Weather in Boston and can't wait for that service to be provided in Atlanta!!! I've thought about a service such as this YEARS ago and couldn't imagine why a station wasn't created sooner!!!! It's frustrating to wait for the local stations to give that info when one needs it immediately. Often, by the time you hear it, it's too late to be useful. PLEASE DO NOT TAKE PROGRESS AWAY!!! I hope the FCC does reject the NAB's petition 04-160 to stifle what the PAYING public wants and needs.
